Contents

Research Papers

A new distinct mechanism of river bank erosion in a forested catchment
R.J. Davis and K.J. Gregory 1
Effective fractal dimension and corrections to the mean of annual maxima
I.J. Dwyer and D.W. Reed 13
The nitrogen isotope composition of groundwater nitrates from the East Midlands Triassic Sandstone aquifer, England
G.B. Wilson, J.N. Andrews and A.H. Bath 35
A combined kinetic and diffusion model for pyrite oxidation in tailings: a change in controls with time
B. Elberling, R.V. Nicholson and J.M. Scharer 47
CELMOD5 — a semi-distributed cell model for conversion of rainfall into runoff in semi-arid watersheds
A.M. Karnieli, M.H. Diskin and L.J. Lane 61
Investigating prediction capability of HEC-1 and KINEROS kinematic wave runoff models
J. Obiukwu Duru and A.T. Hjelmfelt, Jr. 87
Decomposition of groundwater level fluctuations using transfer modelling in an area with shallow to deep unsaturated zones
J.C. Gehrels, F.C. van Geer and J.J. de Vries 105
Major, minor and trace element budgets in the Plynlimon afforested catchments (Wales): general trends, and effects of felling and climate variations
P. Durand, C. Neal, H.A. Jeffery, G.P. Ryland and M. Neal 139
Relationships between atmospheric circulation and snowpack in the Gunnison River basin, Colorado
G.J. McCabe, Jr.. 157
Improvements to the modelling of British rainfall using a modified Random Parameter Bartlett–Lewis Rectangular Pulse Model
C. Onof and H.S. Wheater 177
Note on the analytical expression of the inter-event time characteristics for Bartlett–Lewis type rainfall models
C. Onof, H.S. Wheater and V. Isham 197
Forecasting of hourly accumulations of precipitation by optimal extrapolation of radar maps
A. Bellon and I. Zawadzki 211
Night-time evaporation from a short-rotation willow stand
Z. Iritz and A. Lindroth 235
Optimal estimation of spatially variable recharge and transmissivity fields under steady-state groundwater flow. Part 1. Theory
W.D. Graham and C.D. Tankersley 247
Optimal estimation of spatially variable recharge and transmissivity fields under steady-state groundwater flow. Part 2. Case study
W.D. Graham and C.R. Neff 267
Using monthly precipitation data to estimate the *R*-factor in the revised USLE
K.G. Renard and J.R. Freimund. 287
An entropy approach to data collection network design
Y. Yang and D.H. Burn 307
Hydrological aspects of geophysical borehole measurements in crystalline rocks of the Black Forest
H. Wilhelm, W. Rabbel, E. Lüschen, Y.-D. Li and M. Bried 325
Applicability of linearized Boussinesq equation for modeling bank storage under uncertain aquifer parameters
R.S. Govindaraju and J.K. Koelliker. 349

Model for dolomite formation in northwest Florida
C.R. Cooper and J.A. Tindall 367

Book Reviews
Subsurface Contamination by Immiscible Liquids, by K.U. Weyer (Editor) — C.J. Grant 393
Water Management in Ancient Greek Cities, by D.P. Crouch — I.E.M. Edlund-Berry 394
